

Ideation Phase

Define the Problem Statements

Date	31 January 2025
Name	Aditya Kumar Singh
Project Name	Heritage Treasures: An In-Depth Analysis of UNESCO World Heritage Sites in Tableau
Maximum Marks	2 Marks

Customer Problem Statement Template:

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love.

A well-articulated customer problem statement allows you and your team to find the ideal solution for the challenges your customers face.

Reference: <https://miro.com/templates/customer-problem-statement/>

I am	Describe customer characteristics — who are they?
I'm trying to	List their outcome or 'job' — what are they trying to achieve?
but	Describe what problems or barriers stand in the way
because	Enter the 'root cause' of why the problem or barrier exists
which makes me feel	Describe the emotions from the customer's point of view

PS	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A researcher or student studying global heritage conservation	Understand the distribution and status of UNESCO World Heritage Sites globally	The data is raw, unstructured, and contains HTML tags and missing values	The Kaggle dataset has not been cleaned or prepared for direct analysis	Frustrated and overwhelmed — I cannot draw meaningful insights from messy data
PS-2	A policy maker or heritage organization official	Identify which UNESCO heritage sites are most at risk of extinction and why	There is no single interactive visualization showing endangered sites and their area	Data about endangered sites is scattered across multiple sources without a unified view	Concerned and uncertain — I cannot make informed decisions without clear visual data

Solution Summary

Solution Component	How it Solves the Problem
Python Data Cleaning	Removed HTML tags, nulls, renamed fields — data ready for analysis in Tableau
8 Tableau Visualizations	Charts showing regional distribution, category breakdown, trends over time
Danger Sites Dashboard	World map + treemap + dual axis chart dedicated to endangered heritage sites
Flask Web Application	Accessible web interface with Home, About, Dashboard, and Storyboard pages
