

Project Design Phase

Problem – Solution Fit Template

Date	06 July 2026
Team ID	[Enter Your Team ID]
Project Name	Heritage Treasures: An In-Depth Analysis of UNESCO World Heritage Sites in Tableau
Maximum Marks	2 Marks

Problem – Solution Fit Template:

The Problem-Solution Fit simply means that you have found a problem with your customer and that the solution you have realized for it actually solves the customer's problem. It helps entrepreneurs, marketers and corporate innovators identify behavioral patterns and recognize what would work and why.

Purpose:

- Solve complex problems in a way that fits the state of your customers.
- Succeed faster and increase your solution adoption by tapping into existing mediums and channels of behavior.
- Sharpen your communication and marketing strategy with the right triggers and messaging.
- Increase touch-points with your company by finding the right problem-behavior fit and building trust by solving frequent annoyances, or urgent or costly problems.
- **Understand the existing situation in order to improve it for your target group.**

Filled Canvas — Heritage Treasures UNESCO Tableau Project:

1. CUSTOMER SEGMENT(S) Students & aspiring data analysts building a Tableau portfolio piece; researchers/educators studying heritage trends; travel enthusiasts exploring world heritage sites; course evaluators reviewing the	6. CUSTOMER CONSTRAINTS Limited time to read through UNESCO's lengthy text-based site descriptions; little or no GIS/coding expertise; need a no-install, browser-based way to explore the data; must work within a course	5. AVAILABLE SOLUTIONS Manually browsing whc.unesco.org's site list; reading UNESCO's own PDF reports; generic travel/wiki pages per country; building static Excel pivot tables without visuals or a narrative.
---	--	--

project.	deadline.	
2. JOBS-TO-BE-DONE / PROBLEMS Get a consolidated, visual, and current picture of all 1,121 UNESCO World Heritage Sites — by region, category, and danger status — without manually cross-referencing scattered, text-heavy sources.	9. PROBLEM ROOT CAUSE There is no single, freely accessible, interactive visualization that unifies category, region, danger status, area, and inscription-year trends for the full, current UNESCO Heritage list in one place.	7. BEHAVIOUR Viewers filter by Region/Category/Danger Status, hover the map and charts for details, move through the guided Story, and export/screenshot views to reuse in reports or presentations.
3. TRIGGERS A course assignment deadline; personal interest in travel/culture; a news story about an endangered site; wanting a strong, shareable Tableau Public portfolio piece.	10. YOUR SOLUTION “Heritage Treasures” — an interactive Tableau dashboard and story built on a fully cleaned dataset of all 1,121 sites, combining a world map, region/category breakdowns, a danger-sites analysis, and an inscription-year forecast, published as one shareable Tableau Public link.	8. CHANNELS of BEHAVIOUR 8.1 ONLINE Tableau Public gallery, LinkedIn, course/portfolio website, shared dashboard link. 8.2 OFFLINE Printed screenshots/exports for class presentations and reports.
4. EMOTIONS: BEFORE / AFTER Before: overwhelmed by scattered, text-heavy data and unsure how to compare sites. After: confident and informed — able to explore global heritage trends quickly and share clear insights with others.
