

SCENARIO

Discovering, exploring,
and drawing insights from
the UNESCO World
Heritage Sites Tableau
dashboard and story

- Entice**
How does someone first hear about the dashboard?
- Enter**
What happens as they open it for the first time?
- Engage**
In the core moments, what does exploring look like?
- Exit**
What happens as the session wraps up?
- Extend**
What happens after they've closed the dashboard?

Steps What does the visitor typically do?
Sees it shared on LinkedIn, a portfolio site, or a class presentation
Finds it via a Tableau Public gallery / search for "UNESCO dashboard"
Opens the link to Heritage_Treasures_Dashboard on Tableau Public
Lands on Dashboard 1 - "UNESCO World Heritage Sites Overview"
Filters by Region, Category, or Danger Status
Hovers over map countries and chart bars for tooltips
Clicks between tabs Dashboard 1 → Dashboard 2 → Story
Reads the Story points in sequence for the guided narrative
Reaches the final story point "Danger Sites and Area Analysis"
Takes a screenshot or exports an image of a favorite view
Shares the dashboard link with colleagues or a professor
Bookmarks the Tableau Public profile for future dashboards

Interactions Things: what touchpoints do they use? Places: where are they?
Social post, blog, or Tableau Public gallery listing
Tableau Public web viewer (desktop or mobile browser)
Filter panel (Region / Category / Danger Status)
Interactive map, bar charts, pie chart, forecast line chart
Story navigation arrows and dashboard tabs
Download / export image button in Tableau toolbar
Email, LinkedIn, or Slack to share the dashboard URL

Goals & motivations "Help me..." or "Help me avoid..."
Help me discover an interesting, well-made data project
Help me quickly understand what this dashboard covers
Help me find sites relevant to my interest (region, category, danger)
Help me understand global patterns, not just single sites
Help me walk away with a clear, memorable takeaway
Help me reuse or share these insights with others

Positive moments What's enjoyable, fun, or delightful?
Eye-catching world map thumbnail sparks curiosity
Clean, uncluttered landing dashboard with a clear title
Charts respond instantly to filters — feels alive
Consistent color coding for Region/Category across every sheet
Story format turns raw numbers into a guided narrative
The "Danger Sites" story point lands as a strong closing insight
Easy to share — just one Tableau Public link

Negative moments What's frustrating, confusing, or slow?
Thumbnail alone doesn't say what data the dashboard covers
1,121-mark map takes a moment to render on first load
Country/site labels overlap on the world map and are hard to read
No search box to jump straight to a specific site by name
Sheet tab names are cut off ("Dashboar2", "Danger Sites ...")
No explicit "key takeaways" summary at the very end
No visible contact info or credit if someone wants to reach the author

Areas of opportunity How might we make each step better?
Add a one-line caption describing the dashboard when sharing the link
Add a short intro text box on Dashboard 1 orienting first-time viewers
Add a text/name search filter for individual sites
Rename sheet tabs fully ("Dashboard 2" not "Dashboar2")
Add a fixed legend so color meaning is always visible
Add a final story point summarizing 3-4 key findings
Add an author credit / LinkedIn link in a dashboard footer
